TRANSMITTAL LETTER TO THE UNITED STATES DESIGNATED/ELECTED OFFICE (DO/EO/US) CONCERNING A SUBMISSION UNDER 35 U.S.C. 371		ATTORNEY'S DOCKET NUMBER 00862.023326
INTERNATIONAL APPLICATION NO. PCT/JP03/15094	INTERNATIONAL FILING DATE 26 November 2003	U.S. APPLICATION NO. (If known, see 37 C.F.R. 1.5)
TITLE OF INVENTION IMAGE SUPPLY DEVICE, RECORDING SYSTEM, AND RECORDING CONTROL METHOD		PRIORITY DATE CLAIMED 29 November 2002
APPLICANT(S) FOR DO/EO/US TAKAO AICHI ET AL.		
Applicant herewith submits to the United States Designated/Elected Office (DO/EO/US) the following items and other information: 1. <input checked="" type="checkbox"/> This is a FIRST submission of items concerning a submission under 35 U.S.C. 371. 2. <input type="checkbox"/> This is a SECOND or SUBSEQUENT submission of items concerning a submission under 35 U.S.C. 371. 3. <input checked="" type="checkbox"/> This is an express request to begin national examination procedures (35 U.S.C. 371(f)). The submission must include items (5), (6), (9) and (21) indicated below. 4. <input checked="" type="checkbox"/> The US has been elected (Article 31). 5. <input checked="" type="checkbox"/> A copy of the International Application as filed (35 U.S.C. 371(c)(2)) a. <input type="checkbox"/> is attached hereto (required only if not communicated by the International Bureau). b. <input checked="" type="checkbox"/> has been communicated by the International Bureau. c. <input type="checkbox"/> is not required, as the application was filed in the United States Receiving Office (RO/US). 6. <input type="checkbox"/> An English language translation of the International Application as filed (35 U.S.C. 371(c)(2)). a. <input type="checkbox"/> is attached hereto. b. <input type="checkbox"/> has been previously submitted under 35 U.S.C. 154(d)(4). 7. <input type="checkbox"/> Amendments to the claims of the International Application under PCT Article 19 (35 U.S.C. 371(c)(3)) a. <input type="checkbox"/> are attached hereto (required only if not communicated by the International Bureau). b. <input type="checkbox"/> have been communicated by the International Bureau. c. <input type="checkbox"/> have not been made; however, the time limit for making such amendments has NOT expired. d. <input type="checkbox"/> have not been made and will not be made. 8. <input type="checkbox"/> An English language translation of the amendments to the claims under PCT Article 19 (35 U.S.C. 371(c)(3)). 9. <input checked="" type="checkbox"/> An oath or declaration of the inventor(s) (35 U.S.C. 371(c)(4)). 10. <input type="checkbox"/> An English language translation of the annexes of the International Preliminary Examination Report under PCT Article 36 (35 U.S.C. 371(c)(5)). Items 11 to 20 below concern other document(s) or information included: 11. <input checked="" type="checkbox"/> An Information Disclosure Statement under 37 CFR 1.97 and 1.98. 12. <input checked="" type="checkbox"/> An assignment document for recording. A separate cover sheet in compliance with 37 CFR 3.28 and 3.31 is included. 13. <input checked="" type="checkbox"/> A preliminary amendment. 14. <input checked="" type="checkbox"/> An Application Data Sheet under 37 CFR 1.76. 15. <input type="checkbox"/> A substitute specification. 16. <input type="checkbox"/> A power of attorney and/or change of address letter. 17. <input type="checkbox"/> A computer-readable form of the sequence listing in accordance with PCT Rule 13ter.2 and 37 CFR 1.821 - 1.825. 18. <input type="checkbox"/> A second copy of the published International Application under 35 U.S.C. 154(d)(4). 19. <input type="checkbox"/> A second copy of the English language translation of the international application under 35 U.S.C. 154(d)(4). 20. <input checked="" type="checkbox"/> Other items or information: a) International Preliminary Examination Report with Article 34 Amendment; b) International Search Report; and c) Notice Informing Communication of International Application to Designated Offices		

This collection of information is required by 37 CFR 1.414 and 1.491-1.492. The information is required to obtain or retain a benefit by the public, which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 15 minutes to complete, including gathering information, preparing, and submitting the completed form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Mail Stop PCT, Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

PRELIMINARY AMENDMENT

Sir:

Prior to examination on them merits, Applicants submit the following
amendments.

IN THE CLAIMS:

Please AMEND claims 1-24 and ADD claims 25-33, as follows:

1. (Currently Amended) A recording system in which an image supply device and a recording apparatus are directly communicate with each other connected, and data is supplied from said image supply device to said recording apparatus to attain a recording process, wherein characterized in that

said image supply device comprises:

an interface adapted to connect with a storage medium which stores for storing image data and a first recording condition associated with a recording process of the image data;

acquisition means for acquiring information associated with a function of said recording apparatus by communicating with said ~~upon connection of said~~ recording apparatus;

setting means for setting a second recording condition associated with the recording process of the image data on the basis of the information associated with the function, which is acquired by said acquisition means; and

recording instruction means for issuing a recording instruction to said recording apparatus on the basis of the first and second recording conditions, and

said recording apparatus comprises:

recording control means for controlling to acquire image data stored in said storage medium in accordance with the recording conditions designated by said recording instruction means and to record recording the image data.

2. (Currently Amended) The system according to claim 1, ~~characterized in~~ that wherein said image supply device further comprises selection means for selecting one of the first and second recording conditions to be preferentially used to issue a recording instruction to said recording apparatus.

3. (Currently Amended) The system according to claim 1, ~~characterized in~~ that wherein said image supply device further comprises:

comparison means for comparing the first and second recording conditions;

and

recording condition selection means for, when it is determined as a result of comparison by said comparison means that the first and second recording conditions are different from each other, selecting one of the first and second recording conditions.

4. (Currently Amended) The system according to claim 1, ~~characterized in~~ that wherein said image supply device further comprises:

comparison means for comparing the first and second recording conditions;

and

warning display means for, when it is determined as a result of comparison by said comparison means that the first and second recording conditions are different from each other, displaying a warning.

5. (Currently Amended) The system according to claim 1, ~~characterized in~~ that wherein the first recording condition is designated by a DPOF.

6. (Currently Amended) The system according to claim 5, ~~characterized in~~ that wherein said image supply device comprises input means for inputting the first recording condition, and means for generating the DPOF on the basis of information input by said input means.

7. (Currently Amended) The system according to claim 1, ~~characterized in~~ that wherein said recording instruction means generates a command sequence for the second recording condition, which includes image data selected by the first recording condition in the second recording condition.

8. (Currently Amended) The system according to claim 1, ~~characterized in~~ that wherein the second recording condition is a recording condition based on a common protocol between said image supply device and said recording apparatus.

9. (Currently Amended) An image supply device ~~characterized by~~ comprising:

an interface adapted to connect with a storage medium for storing image data
and a first recording condition associated with a recording process of the image data;
acquisition means for acquiring information associated with a function of a

recording apparatus by communicating with ~~upon connection of~~ the recording apparatus;

setting means for setting a second recording condition associated with the recording process of the image data on the basis of the information associated with the function, which is acquired by said acquisition means; and

recording instruction means for issuing a recording instruction to the recording apparatus on the basis of the first and second recording conditions.

10. (Currently Amended) The device according to claim 9, ~~characterized by~~ further comprising selection means for selecting one of the first and second recording conditions to be preferentially used to issue a recording instruction to said recording apparatus.

11. (Currently Amended) The device according to claim 9, ~~characterized by~~ further comprising comparison means for comparing the first and second recording conditions. and recording condition selection means for, when it is determined as a result of comparison by said comparison means that the first and second recording conditions are different from each other, selecting one of the first and second recording conditions.

12. (Currently Amended) The device according to claim 9, ~~characterized by~~ further comprising comparison means for comparing the first and second recording conditions, and warning display means for, when it is determined as a result of comparison by said comparison means that the first and second recording conditions are different from each other, displaying a warning.

13. (Currently Amended) The device according to claim 9, characterized in that wherein the first recording condition is designated by a DPOF.

14. (Currently Amended) The device according to claim 13, characterized by further comprising input means for inputting the first recording condition, and means for generating the DPOF on the basis of information input by said input means.

15. (Currently Amended) The device according to claim 9, characterized in that wherein said recording instruction means generates a command sequence for the second recording condition, which includes image data selected by the first recording condition in the second recording condition.

16. (Currently Amended) The device according to claim 9, characterized in that wherein the second recording condition is a recording condition based on a common protocol between said image supply device and the recording apparatus.

17. (Currently Amended) A recording control method for recording by directly communicating connecting an image supply device and a recording apparatus, and supplying data from the image supply device to the recording apparatus, characterized by comprising:

a storage step of storing image data and a first recording condition associated with a recording process of the image data in a storage medium;

an acquisition step of acquiring information associated with a function of the recording apparatus by communicating with ~~upon connection of~~ the recording apparatus;

a setting step of setting a second recording condition associated with the recording process of the image data on the basis of the information associated with the function, which is acquired in the acquisition step;

a recording instruction step of issuing a recording instruction to the recording apparatus on the basis of the first recording condition stored in the storage medium in the storage step, and the second recording condition; and

a recording control step of controlling to acquire image data stored in the storage medium in accordance with the recording conditions designated in the recording instruction step and to record ~~recording~~ the image data.

18. (Currently Amended) The method according to claim 17, characterized by further comprising a selection step of selecting one of the first and second recording conditions to be preferentially used to issue a recording instruction to the recording apparatus.

19. (Currently Amended) The method according to claim 17, characterized by further comprising a comparison step of comparing the first and second recording conditions; and a recording condition selection step of selecting, when it is determined as a result of comparison in the comparison step that the first and second recording conditions are different from each other, one of the first and second recording conditions.

20. (Currently Amended) The method according to claim 17, characterized by further comprising a comparison step of comparing the first and second recording conditions, and a warning display step of displaying, when it is determined as a result of comparison in the comparison step that the first and second recording conditions are different from each other, a warning.

21. (Currently Amended) The method according to claim 17, characterized in that wherein the first recording condition is designated by a DPOF.

22. (Currently Amended) The method according to claim 21, characterized by further comprising an input step of inputting the first recording condition, and a step of generating the DPOF on the basis of information input in the input step.

23. (Currently Amended) The method according to claim 17, characterized in that wherein the recording instruction step includes a step of generating a command sequence for the second recording condition, which includes image data selected by the first recording condition in the second recording condition.

24. (Currently Amended) The method according to claim 17, characterized in that wherein the second recording condition is a recording condition based on a common protocol between the image supply device and the recording apparatus.

25. (New) An image supply device comprising:
an interface adapted to connect with a storage medium which stores image data
and a first recording condition associated with a recording process of the image data;
acquisition means for acquiring information associated with a function of a
recording apparatus by communicating with the recording apparatus;
setting means for setting a second recording condition associated with the
recording process of the image data on the basis of the information associated with the function,
which is acquired by said acquisition means; and
transmission means for transmitting the second recording condition including
information for designating the first recording condition to the recording apparatus.

26. (New) The device according to claim 25, wherein the information for
designating the first recording condition designates a DPOF file.

27. (New) A recording apparatus comprising:
transmission means for transmitting information relating to the functions of the
recording apparatus to an image supply device; and
reception means for receiving information to designate a first recording
condition which the image supply device has, wherein the information is designated by a second
recording condition in accordance with the information relating to the functions of the recording
apparatus,
wherein the information to designate the first recording condition is described

as image data to be recorded in the second recording condition.

28. (New) The apparatus according to claim 27, wherein the first recording condition is a DPOF file.

29. (New) A control method of an image supply device comprising:
a reading step of reading image data via an interface from a storage medium which stores the image data and a first recording condition associated with a recording process of the image data;

an acquisition step of acquiring information associated with a function of a recording apparatus by communicating with the recording apparatus;

a setting step of setting a second recording condition associated with the recording process of the image data on the basis of the information associated with the function, which is acquired in said acquisition step; and

a transmission step of transmitting the second recording condition including information for designating the first recording condition to the recording apparatus.

30. (New) A control method of a recording apparatus, comprising:
a transmission step of transmitting information relating to the functions of the recording apparatus to an image supply device; and

a reception step of receiving information to designate a first recording condition which the image supply device has, wherein the information is designated by a second

recording condition in accordance with the information relating to the functions of the recording apparatus,

wherein the information to designate the first recording condition is described as image data to be recorded in the second recording condition.

31. (New) A recording medium capable of being read by a computer, for storing a program for implementing a recording control method according to claim 17.

32. (New) A recording medium capable of being read by a computer, for storing a program for implementing a control method according to claim 29.

33. (New) A recording medium capable of being read by a computer, for storing a program for implementing a control method according to claim 30.

REMARKS

Claims 1-33 are presented for examination on the merits. Claims 1, 9, and 17 have been amended and Claims 25-33 have been added in accordance with Article 34 amendments in the international PCT application. Additional minor changes have been made to improve their form. Support for the amendments and additional claims may be found in the application as filed herewith. No new matter has been introduced.

Favorable consideration and early passage to issue are respectfully requested.

Applicants' undersigned attorney may be reached in our Washington, D.C. office by telephone at (202) 530-1010. All correspondence should continue to be directed to our below listed address.

Respectfully submitted,

REQUEST FOR REFUND

Sir:

In connection with the above-identified application, Applicant requests a refund of \$320.00 for a multiple dependent claims fee, which was erroneously charged to our Deposit Account 06-1205. It is requested that the refund be applied as a credit to that Deposit Account. The reason for the refund is explained below.

On March 25, 2005, Applicants filed a Transmittal Letter Under 35 U.S.C. § 371 and Preliminary Amendment. Copies of the Transmittal Letter, Preliminary Amendment, and return receipt postcards are attached. Applicants paid the appropriate filing fee of \$2,400.00 and Assignment Recordal Fee of \$40.00 at that time. There are no multiple dependent claims.

The Patent Office's Monthly Statement of Deposit Account, dated March 2005 (copy attached), indicates that Deposit Account No. 06-1205 was charged the fee of

\$320.00 (which is the \$360.00 multiple dependent claims fee minus the \$40.00 Assignment Recordal Fee). Therefore, Applicants respectfully submit that a refund of \$320.00 is due.

Accordingly, Applicants hereby request a refund and authorizes the Commissioner to credit Deposit Account No. 06-1205 in the amount of \$320.00, to resolve this matter.

Applicants' undersigned attorney may be reached in our Washington, D.C. office by telephone at (202) 530-1010. All correspondence should continue to be directed to our below-listed address.
